Inventorship

1. In view of the papers filed 13 April 2005, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by the addition of the following inventor: John E. Feaster

Information Disclosure Statement

2. In the IDS the references that were lined through were previously considered and already of record. The remaining references have been considered however they are not seen to teach and/or fairly suggest the instant invention.

EXAMINER'S AMENDMENT

3. In the examiner's amendment previously made dated 01/13/05 (mailroom date of 01/18/05) the amendment to claim 19 should read as follows:

In claim 19, line 2, the term "copper" (first occurrence) has been deleted and replaced with the term: -- Cu(II) --.

instant invention. While it is known in the art to use various copper complexes and chelating agents in wood preservative compositions (see the art of record) the references fail to teach and/or fairly suggest the use of a copper complex of a chelating compound comprising at least two functional groups selected from the group consisting of amidoxime, hydroxamic acid, thiohydroxamic acid, N-hydroxyurea, N-hydroxycarbamate, and N-nitroso-allyl-hydroxylamine in combination with ammonia, ethanolamine or pyridine in an amount sufficient to solubilize the copper complex. This combination cannot be ascertained or deduced from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
